SunPower is consistently one of our top picks for solar companies overall, and we found the Maxeon X-Series to be one of the best cheap panels for residential use. SunPower guarantees its X-Series panels won't lose more than 8% of their power production over 25 years, and its 25-year warranty covers panel equipment and power.

How much does a home solar system cost?

As of 2025, the average cost of home solar installations is between \$18,000 and \$23,000. Cutting corners can save you money, but you don't want to sacrifice quality when it comes to an investment like solar. We've compiled a list of reliable, low-cost solar panels that produce great results to provide the best of both worlds.

How much do solar panels cost?

One of the biggest barriers to getting solar panels is the high upfront cost. As of 2025, the average cost of home solar installations is between \$18,000 and \$23,000. Cutting corners can save you money, but you don't want to sacrifice quality when it comes to an investment like solar.

Can solar panels save you money?

As sunlight is a free resource, a typical solar panel system can save you around 50-70% on your electricity bills. Plus, you can actually make money from your solar panels. When your panels generate more electricity than your household can use, this excess electricity can be exported to the grid to be used by others.
