

How do I know if my inverter is bad?

OK - hopefully someone with a Deye / Sunsynk / Sol-Ark will be able to help. 1. LOW BAT Low battery voltage or % (battery symbol on the home screen will turn yellow). Stopping point for TOU. 2. SHUT DOWN Battery voltage or % at which the inverter will shut down to protect the battery from an over discharge situation. 3.

How to set up a PV inverter?

Open circuit Voltage (Voc) of PV modules should be higher than min. start voltage. Switch the Grid Supply Main Switch(AC)OFF. Switch the DC Isolator OFF. Assemble PV input connector to the inverter. Please don't connect PV array positive or negative pole to the ground, it could cause serious damages to the inverter.

Can You disassemble an inverter?

Do not disassemble the inverter. If you need maintenance or repair, take it to a professional service center. Improper reassembly may result in electric shock or fire. To reduce risk of electric shock, disconnect all wires before attempting any maintenance or cleaning. Turning off the unit will not reduce this risk.

How to connect a DC Isolator to a PV inverter?

Switch the DC Isolator OFF. Assemble PV input connector to the inverter. Please don't connect PV array positive or negative pole to the ground, it could cause serious damages to the inverter. Before connection, please make sure the polarity of the output voltage of PV array matches the "DC+" and "DC-" symbols.

How to install an inverter on a wall?

Choose the recommend drill head(as shown in below pic) to drill 4 holes on the wall, 52-60mm deep. Use a proper hammer to fit the expansion bolt into the holes. Carry the inverter and holding it, make sure the hanger aim at the expansion bolt, fix the inverter on the wall. Fasten the screw head of the expansion bolt to finish the mounting.
