

What is the power range of Deye's three-phase on-grid inverters?

Deye three-phase on-grid inverter power range is from 4kW to 110kW with 230/400Vac. What's more, the new product- SUN-10.5K-G is one of the maximum power models of single-phase on-grid inverter on the market. Solution and service by Deye - professional single phase string inverter manufacturer.

What is the power capacity of a Deye solar inverter?

Deye's On-Grid Solar Inverters, with power capacities ranging from 10kW to 21kW and available in three-phase configurations, find widespread applications in various scenarios, both in commercial and residential settings. These inverters are renowned for their versatility, but selecting the right power capacity is essential for optimal performance.

Can Deye string inverter use in poor grid area?

Deye string inverters are capable of being used in poor grid areas thanks to their frequency droop feature. Deye, a PV inverter manufacturer and Solar On-grid, Grid-tie inverter supplier in China, was founded in 2007 with registered capital of 205 million RMB (Over 30 million USD).

What is the power range of Deye's string inverter?

Deye's three-phase on-grid string inverter has a power range of 4kW to 110kW with 230/400Vac. It can connect to the utility grid directly without a transformer.

Who is Deye in the solar inverter industry?

Deye is a major player in the global solar inverter market. Founded in 2007 with registered capital of 205 million RMB (over 30 million USD), it is one of China's high-tech enterprises and a subsidiary of Deye Group. The company's factory covers over 15,000m²; and has complete production and testing equipment.

Why should you use Deye solar inverters?

Deye's On-Grid Solar Inverters help retail establishments lower operating costs and demonstrate a commitment to sustainability. Educational Institutions: Schools, colleges, and universities can incorporate these inverters into their sustainability initiatives, generating clean energy and reducing their environmental impact.
