

Are Deye & sunsynk hybrid inverters the same?

Undoubtedly, the Deye & SunSynk Hybrid inverters are among the most popular solar power inverter brands in South Africa. They have both received excellent reviews from both consumers and installers alike. They look similar and have similar specifications, so what is the difference between a Deye and SunSynk Inverter?

Who makes sunsynk inverters?

Ningbo Deye Inverter Technology Co., Ltd. (Deye) manufactures the SunSynk Inverters, hence the likeness in appearance and the inverters' near identical parameters. Similarly, you may have seen the black Fusion Hybrid Inverters in circulation, which are rebranded Deye inverters.

Should you choose Deye or sunsynk inverters?

Maximum Efficiency: Both Deye and SunSynk inverters boast a maximum efficiency of 97.6%, ensuring optimal energy conversion. However, if the interface and software are significant factors for your decision, Deye might be the preferable choice. Deye's user-friendly interface and lower inverter cost can be attractive.

Can a Deye inverter connect to a sunsynk app?

Both the Deye inverter and SunSynk inverter can connect to an app via wifi. However, SunSynk has its own app, while Deye customers use either the Solar Man App or Solar Assistant to connect to their inverter to find their consumption and production data. Solar Man is a downloadable app available for both iOS and Android users.

What is the difference between Deye/Fusion vs sunsynk?

When it comes to Deye/Fusion vs SunSynk, there is a slight difference between them in terms of their parameters, but the main differences are in the user interface & software. We must compare the parameters of the Deye and SunSynk pure sine wave inverters. Therefore, we need to examine their datasheets.

What is the difference between a sunsync and a Deye?

The sunsynk is just a deye with a different screen. All the values can be fetched from a deye and the screen of a sunsync can easily be drawn in software to be identical to the sunsync (there is a home assistant plugin that does this). The only difference would be when it comes to support and repairs should something break.

After a small incident on the forum this morning we decided to do a little comparison about the functionality of these two brands. At the end we will compile a table to ...

While the Deye inverter has a rated AC output power of 5000W and a max AC output power of 5500W, the SunSynk inverter offers a slightly higher rated AC output power of 5500W with the same maximum AC output power. SunSynk ...

Hi All I am new to the forum and this is officially my first post. ? This week I had my PV system installed which includes an 8kW Deye hybrid inverter, 16 x 540W JA panels plus 3 ...
