Can you make a solar water fountain on a budget?

This DIY solar water fountain tutorial will give you the same look on a budget! There is nothing like the trickling sound of water coming from your own water fountain to make your outside space relaxing and serene. Unfortunately, most outdoor fountains have a very high price tag and can be a pain to install.

How does a solar water fountain work?

A solar water fountain uses the sun as its main power source and does not have electrical cords. Some use a water pump connected to a solar panel, while others require a battery for power during cloudy days. Here are 17 ideas you can use to make a functional and beautiful DIY solar water fountain. 1. DIY Solar Water Fountain with Garden Planter

What do you need for a solar water fountain?

Items needed are 2 flower pots, flower pot saucer, plastic pail, river rocks and solar water fountain. The bucket is going to support the top pot so make sure you use one that is not going to buckle under the weight of the water and the pot. To read more, [click here](#). 8. Cheap and Easy DIY Solar Water Fountain

How to make a solar fountain?

To make a solar fountain, first, allow the concrete to dry for 12 hours and then cut off any excess foam using a craft knife. Next, place a large plastic pot upside down in a large container. Fill the container around the plastic pot with soil. Set a smaller pot on top and plant flowers around the two pots. Fill the top pot with water and add a solar fountain insert. Finally, place the solar fountain in an area that receives light and enjoy.

How long does it take to make a solar water fountain?

The fountain pump is very basic and does not have a fountain tip. She shows how to keep the solar panel away from the water and directly in the sun. This double-tier flower pot solar water fountain looks so pretty it's hard to believe it only takes 15 minutes to make.
