

Does an electric car charging station have a diesel generator?

An Oct. 25 Instagram video ([direct link](#),[archive link](#)) shows an Australian electric vehicle charging station that includes a large blue diesel generator. "Look! It's an electric charger for an electric car, and right there that is a diesel-powered generator to run your electric charging point for your car," a narrator says.

Are electric charging stations powered by diesel generators a symbol of electric vehicle movement?

Photo of electric charging station "powered by diesel generator" is emblematic of the electric vehicle movement. Tesla charging stations in Robbinsdale, Minn. (AP Photo/Abbie Parr)

Do electric vehicle chargers use diesel?

A video shows new electric vehicle chargers with a generator operating nearby which is using diesel to power them. This is false. The generator is using hydrotreated vegetable oil and is facilitating the installation work. Once operational the chargers will power electric vehicles using renewable energy.

Are 'brand new' electric vehicle charging points powered by a diesel generator?

A social media video has falsely claimed that "brand new" electric vehicle charging points being installed at a Welsh service station are powered by a diesel generator. The Facebook video, which has been shared more than 9,000 times, shows a number of new charging stations for electric vehicles at the Cardiff West services off the M4 motorway.

Is there a commercial charging station for electric vehicles?

The photo shared in the social media post does not show a commercially available charging station for electric vehicles. It's actually a photo from six years ago of an experiment conducted by a retired engineer in Western Australia.

Does EV charging rely on diesel or gas generators?

The EV charging network doesn't rely on diesel or gas generators at all. Electric vehicles have soared in popularity in recent years, offering drivers a way to get around that doesn't depend on gasoline. But some posts on social media claim those drivers are still burning fuel by using diesel generators to charge their cars.

Even if they're on-site for only a few hours, their unacceptably high levels of noise and emissions from chimney-like exhausts are unbearable for those living nearby.
