

Do destiny's solar transmitters contain more power than a zpm

What is a Zero Point Module (ZPM)?

A Zero Point Module, often abbreviated to ZPM, is an Ancient power source. ZPMs generate their power from vacuum energy derived from a self-contained region of subspace time. (SGA: "Rising") A ZPM is needed to power Ancient outposts. (SG1: "Lost City, Part 2") Atlantis can be powered by three ZPMs. (SGA: "Rising")

How much energy does a ZPM have?

Before we say how much energy it has, we have to make some assumptions: A single ZPM is capable of powering the star drive and shield simultaneously, allowing the city ship to escape (at least) an Earth-size planet, meaning it is capable of achieving at least 11m/s delta V, under sublight engines.

Can a ZPM power a city-ship?

ZPMs are among the only known power sources capable of effectively powering control chairs as well as the shield and stardrive of a city-ship. (SGA: "Rising", "The Siege, Part 2", "The Siege, Part 3", "First Strike")

Which ZPM has the highest power output?

The highest power output has been 2% of the ZPM's total energy reserves per second, under perfectly stable and controlled conditions. The Al'kesh is not a warship - Info on Naqahdah & Naqahdria - Firepower of Goa'uld staff weapons - Everything about Hiveships and the Wraith - An idea about what powers Destiny ...

Can power storage be a ZPM?

From what I understand about the possible forms of power storage in the canon universe, it cannot be a ZPM, since ZPMs utilize vacuum energy and are non-rechargeable. The most interesting clue I can gather is from SGU's Awakening, where in one scene the main monitor displays an abstract view of the power levels aboard Destiny.

What was the purpose of the ZPM?

(SG1: "Lost City, Part 2") The ZPM was used to power the Stargate in order to reach Atlantis in the Pegasus galaxy. Two of the three ZPMs on Atlantis were depleted and the third one was reaching maximum entropy and soon failed.

The crystals that compose the shell of the ZPM are similar in many ways to the crystals adapted by the Goa'uld and Tok'ra: red crystals contain the necessary programs to allow ZPMs to provide power to Ancient technology ...

If people are assuming that ZPMs were difficult to make, and so much more powerful than other power sources, it makes sense that the technology would be designed to ...

Do destiny s solar transmitters contain more power than a zpm

A Zero Point Module, often abbreviated ZPM, is power source, created by the Ancients, capable of supplying tremendous amounts of energy. It is one of the most powerful ...

The power of a ZPM is impressive, but another question is, can it be released over a short enough period to power the connection? We know a ZPM can be overloaded, so likely there is a limit on the rate energy is drawn from it. We only know that the ZPM has a final capacity, as it works much the same way as a battery (non-rechargeable).

3. Dyson sphere- This is iffy number 3, sure depending upon the star and the amount of time it lasts you might be able to get more power than a ZPM but your output at any given moment is far far less than what the ZPM is ...

What I'd like to know is how long the 3 ZPM's would have lasted if the city were still submerged and fully populated. Keeping the city powered 24/7 with all those people would have to have eaten up a lot more power than while slumbering. And, how long would the ZPM's have held out if, on top of all that, the Wraith kept up their siege?

Since it just gets slowly loaded to that energly second and unleashes its whole power in one wave, it should be more "realistic" for him to build something like that in good old McGyver style then just build a whole ZPM that normally has that kind of engergy available over months / years.

A Zero Point Module, often abbreviated ZPM, is a power source, created by the Ancients, capable of supplying tremendous amounts of energy. It is one of the most formidable power sources known to exist, having been developed by the Ancients several million years ago during their original habitation of the Milky Way galaxy. Visually, a Zero Point Module ...

look. the zpm is an extractor. as mckay puts it: it extracts zero point energy from a self-contained region of subspace. so in other words, to make a zpm, you copy an existing one, reprogramm it to make a new region of subspace, and hook it up to some serious powersource[read: sun/blackhole]. because, the sun and blackholes generate massive amounts of power, ...

The ZPM draws power from the zero point energy, a tiny amount from each small bit of the enclosed subspace that adds up to unimaginable power in total. Theoretically the ...

KEY EPISODES. Lost City, Part 2 - SG-1 retrieves an Ancient power cell from Proclarush Taonas to take back to Earth, where it is instrumental in destroying Anubis's fleet. Rising, Part 1 - Earth's only Zero Point Module, ...

window. Reload to refresh your session. You switched accounts on another tab ...

A Zero Point Module, often abbreviated to ZPM, is an Ancient power source. Overview. ZPMs generate their power from vacuum energy derived from a self-contained ...

a ZPM, based upon several calculations, has an energy of about 10^{35} joules, an average over several episodes based upon the released energy. it has to be above 10^{33} , since that's planet shattering and Carter states it would do more. Trinity suggests something more ...

The ZPM draws power from the zero point energy, a tiny amount from each small bit of the enclosed subspace that adds up to unimaginable power in total. Theoretically the ZPM should never become depleted, but since all mechanical devices have imperfections, it is likely there is a miniscule amount of loss in the system that eventually leads to ...

?StarGate?,ZPM(Zero Point Module)?... R1 / ZPM??StarGate? ...

One of the possible methods that Destiny could use is a more advanced form of Subspace Capacitor. In The Daedalus Variations, the Daedalus utilized a subspace capacitor ...

In Stargate SG-1 and Stargate Atlantis, an ancient race of humans* developed a technology called a ZPM (or Zed-PM for McKay fans out there).. These zero-point modules were capable of immense power ...

The zero point module, or ZPM, is an Ancient crystal power source that draws its energy from subspace. The device was first discovered on Praclarush Taonas and brought back to Earth. At the Ancient outpost in ...

Using the ZPM slowly makes the crystal more and more unsuitable for storing the quantum foam until it can no longer do it at all, causing the quantum foam to collapse and the ZPM to become worthless. 1 P. Phant0m5. Apr 7, 2015 #7 Kenta789 said: ... MANY instances of a ZPM running out of power. What do you figure is causing that?
