

# Do most gas stations have place to charge cars

Do some gas stations have charging stations?

Yes, charging stations are being installed at some gas stations. For example, in Takoma Park, Maryland, a gas station owner replaced his gas pumps with four high-powered 200 kW charging stations.

Should EV drivers charge their vehicles at a gas station?

Just behind workplace charging in terms of popularity is gas station charging. As per our research, 29 percent of European EV drivers charge their vehicles at gas stations regularly, plus a further one in five would love to do so should the option become available.

What makes gas station charging attractive?

What makes gas station charging attractive is that many fuel retailers offer what's known as DC fast charging. Also known as Level 3 charging, this is the fastest charging method available, replenishing a vehicle's battery in just minutes as opposed to hours.

Where can I charge my car if I don't have a charger?

Those without that capability, or drivers headed a long distance who need to charge along the way, can head to a charging station with a faster commercial Level 3 charger -- typically located in a shopping center or apartment parking lot and only sometimes at a gas station.

Where is the first EV charging station in the US?

RS Automotive in Takoma Park, Maryland is the first US gas station fully converted to an electric vehicle-charging station, as reported by NPR. With its blue and white sign that posts EV charging rather than dollar and cents gas pricing, gas stations and EV chargers seem quite similar and familiar to the passing drivers.

Why are gas stations slow to install EV charging?

Gas stations have been slow to install EV charging because doing so is expensive and any margins are slim at best. That's why EV retailers have been stepping in, said Garrett Fitzgerald, the head of electrification at the Smart Electric Power Alliance, a nonprofit that works with electric utilities to implement and deploy clean energy resources.
