

## Do you need home charging station for bmw 530e car

Can I Charge my BMW 530e at home?

In reality, you typically only "fill up" your car's battery over the course of two to three hours. Find out more about charging at home here. Use cheaper energy rates to charge your BMW 530e plug-in hybrid overnight so that you can leave each morning with a full tank of gas. My BMW 530e may I charge it at home?

How long does it take to charge a BMW 530e?

The Occasional Use cord, which comes with all the 530e's, took about 11 hours to charge my 2019 (it has a smaller battery than yours). The optional 'TurboCord' from BMW claims to be up to 3 times faster. But it's like a \$500 option from BMW. For that you can get a decent Level 2 charger (or at least close) which cut my charging time to 2 hours.

Does the BMW 530e have rapid charging?

The 530e lacks rapid charging capability, like the majority of PHEVs. The BMW 530e Type 2 intake is located on the front flank in front of the passenger door and behind the near-side front wheel. Depending on the network and kind of charge unit, the BMW 530e can get both slow and quick charges from public outlets.

Does the BMW 530e have type 2 charging?

The Type 2 charging standard, which is used for all charging requirements, is what the BMW 530e employs. When charging at home or at public slow and fast AC stations, the Type 2 inlet is utilized. The 530e lacks rapid charging capability, like the majority of PHEVs.

Do BMWs need a charging cable?

A standard charging cable that may be inserted into your home's wall socket is part of the usual home vehicle charger equipment for BMWs. On the other hand, a public charging cable ("Mode 3") that comes with a Type 2 connector for BMW vehicles is advised for charging at public AC charging stations.

How much energy does a 530e take from a home charger?

The 530e has a 9.2 kWh battery pack. My home charger lets me know the exact amount of energy it sends to the car in kWh. The most electricity the car has ever taken from my charger (and this would have been when the battery range was listed as "---") was 7.749 kWh.
