

Does Milton Keynes have solar?

For six months out of the year, Milton Keynes receives solar irradiance of more than 4.1 kWh of power per square meter, per day [1]. That means you'll have plenty of available solar energy to convert into electricity for your home, business, school, or other site.

Does Milton Keynes get enough sunlight to generate electricity?

Given this experience, we can say with confidence that Milton Keynes and the surrounding area is a great geographic location for generating energy from the sun. Many clients ask us if they will receive enough sunlight in the Milton Keynes area to generate electricity from solar photovoltaic panels. We're happy to say the answer is yes!

Who are Cambridge solar?

Here at Cambridge Solar Ltd, we are experts at designing and installing high quality solar panel systems for domestic and commercial customers. Our technical staff have designed solar panel systems that have been installed all over the world, and since 2009 our installation staff have installed hundreds of solar panel systems across East Anglia.

Is Cambridge solar a MCS approved solar panel installer?

As an MCS-approved solar panel installer, Cambridge Solar Ltd follows the industry standard, best practices for determining how quickly your solar system will pay for itself in energy savings [6].
