

What is Duke Energy powerpair?

With up to \$9,000 in rebates per system, Duke Energy PowerPair program reduces the cost burden of installing solar and battery systems in North Carolina. This incentive has limited capacity and is expected to go quickly. Connect with an Energy Advisor to make a game plan for claiming it! See how much solar panels cost in your area.

How many solar projects does Duke Energy have?

Duke Energy has 180 solar projects in 16 states and can generate more than 10,000 megawatts of electricity from wind and solar. That's enough to power more than 2.4 million homes and businesses. As Duke Energy works to reach net-zero carbon emissions by 2050, it will build more wind and solar.

Does Duke Energy offer a solar & battery incentive?

The incentive only applies to new solar AND battery systems. Solar-only and battery-only systems do not qualify. At this time, Duke Energy has not released any equipment eligibility requirements. There are two options in the program: PowerPair and PowerPair + EnergyWise Battery Control. The key differences are:

Does Duke Energy offer solar rebates in North Carolina?

Duke Energy offers rebates to North Carolina customers who want to install a solar panel system. For homeowners, the program offers a \$0.60/Watt rebate for systems up to 10 kilowatts. The benefit is equivalent to \$3,600 for a 6 kilowatt (kW) system. Nonresidential customers also have access to rebates of \$0.50/Watt to \$0.75/Watt.

How do I sign up for Duke Energy powerpair program notifications?

Visit the PowerPair program page to sign up for program notifications. Solar and battery allow homeowners to hedge against rising utility rates and power their homes when the grid goes down. With up to \$9,000 in rebates per system, Duke Energy PowerPair program reduces the cost burden of installing solar and battery systems in North Carolina.

What will Duke Energy do with more wind and solar?

With more wind and solar, Duke Energy will also add more energy storage in the form of batteries and upgraded pumped storage hydropower to help with the intermittency and its swings in voltage. The company is also upgrading the electric grid so it can handle a two-way flow of electricity, which wasn't required when the grid was originally designed.

250-MW plant now online in Navarro County, Texas Three companies purchased output under 15-year VPPAs Duke Energy Sustainable Solutions (DESS), a nonregulated ...

Once completed, these facilities will contribute nearly 300 megawatts of carbon-free energy to the electric grid. At full capacity, each of the four 74.9-megawatt solar sites will ...

Project will provide low-cost solar power to Austin Energy customers; CHARLOTTE, N.C. and GUELPH, Ontario, Canada - Duke Energy Renewables, a subsidiary of Duke Energy (NYSE: DUK), is expanding its ...
