

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.

How do I find out if a charging station is nearby?

To find out if a charging station is nearby, use ChargeFinder's station page which shows relevant information like charging speed, outlet type, price, and location. Additionally, the "Food and Shopping Nearby" feature helps you find points of interest near the charging station.

What power level does a destination Charger offer?

Destination chargers usually provide an output of 3 kW to 22 kW. The color shades on the map indicate the power level: light orange for 3-7 kW and darkest orange for 22 kW. The most common are fast chargers, shown in dark blue, which provide 50 kW.

What color represents Superfast chargers on the map?

Chargers with power over 100 kW are shown with a purple marker on the charging map. These are known as Superfast chargers (HPC - High Power Chargers) and provide an effect from 100 kW up to 350 kW.

How does ChargeFinder work?

ChargeFinder retrieves information in real time from various operators to show you which charging stations are available right now. It provides live status for all major operators in one place.

What power level do dark orange chargers represent?

Light orange means 3-7 kW and the darkest orange shade means 22 kW. Various shades of orange markers on the map mean destination charging.
