

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage, Nature Communications 2017, 8 (1), 1478. Research Projects. National Natural Science Foundation of China. National Key R& D Project from Ministry of ...

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage Zhongyong Wang 1, Zhen Tong 2, Qinxian Ye 1, Hang Hu 1, Xiao Nie 1, Chen Yan 2, Wen Shang 1, ...

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage. Coronavirus: Find the latest articles and preprints ...

71,()57,()14,65?1,1,10,8,3, ...

(DOI: 10.1038/S41467-017-01618-W) Currently, solar-thermal energy storage within phase-change materials relies on adding high thermal-conductivity fillers to improve the thermal ...

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage. Nat Commun, 8 (2017), Article 1478. View in Scopus Google Scholar. This work demonstrated ...

In this work, we have shown that dynamic tuning the distribution of the optical absorbers realizes the simultaneous achievement of fast charging rates, large phase-change ...

,(2008)?(2010)?(2011)?" ...

Currently, solar-thermal energy storage within phase-change materials relies on adding high thermal-conductivity fillers to improve the thermal-diffusion-based charging r ...

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage. Z Wang, Z Tong, Q Ye, H Hu, X Nie, C Yan, W Shang, C Song, J Wu, ... Nature communications 8 (1), ...

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage. Nat. Commun. (2017) ... liquid leakage and lack of photoabsorption ability. In this work, a ...

Compared with conventional thermal charging, the optical charging strategy improves the charging rate by more than 270% and triples the amount of overall stored thermal energy.

Dynamic tuning of optical absorbers for accelerated solar-thermal energy storage

Deng(*), Optical nanofluids for direct absorption-based solar-thermal energy harvesting at medium-to-high ...

1991-01 ~ 1996-01 1996-01 ~ 2001-01 2001-01 ~ 2003-01 2003-01 ~ 2012 ...

Femtosecond laser processing is a single-step, environmentally friendly, and monolithic approach that can directly transform a metal surface to a solar absorber through surface patterning without adding additional weight, ...

Currently, solar-thermal energy storage within phase-change materials relies on adding high thermal-conductivity fillers to improve the thermal-diffusion-based charging rate, ...

Here we report the exploration of a magnetically enhanced photon-transport-based charging approach, which enables the dynamic tuning of the distribution of optical ...
