

How many solar panels does El Paso have?

It has nine other major solar plants on its grid in West Texas and southern New Mexico. The new, 150-megawatt plant, with about 340,000 solar panels, will produce enough power for about 75,000 El Paso homes. But 50MW of power will be reserved for EPE's new Texas Business Community Solar Program.

Will El Paso Electric charge for solar panels?

EPE officials share that if a consumer chooses to purchase solar panels for their home, know that there will be a 30-dollar minimum El Paso Electric charge attached to their bill.

Where is the largest solar plant in El Paso?

The \$200 million Felina Solar Resource plant project, located on about 1,000 acres of remote desert land in far East El Paso County, will be the largest solar plant in El Paso, one of the two largest in EPE's grid, and the first to be operated by the utility.

Where is El Paso Electric's new solar farm?

El Paso Electric on Tuesday unveiled the utility's newly built Buena Vista solar farm outside Chaparral, New Mexico. (Diego Mendoza-Moyers/El Paso Matters) This is your Friday update, which takes a quick look at the week ahead and some developments that El Paso Matters is following.

Where is El Paso's new solar power plant located?

Another 150MW solar plant also is under construction in Santa Teresa, New Mexico, on El Paso's western edge. EPE has an agreement to buy all the power from the Hecate Energy plant when completed. Vic Kolenc may be reached at 915-546-6421; vkolenc@elpasotimes.com; @vickolenc on Twitter, now known as X.

What is El Paso Electric's Buena Vista Solar Farm?

El Paso Electric will be able to charge the batteries when the sun is highest at midday, and then send the electricity stored in the batteries onto the grid in the evening hours after the sun has set. Buena Vista is the first in a series of large solar farms that El Paso Electric is adding to its power generation portfolio.

If you pay for your system with cash, you'll save about \$37,959 over 25 years (the warranty term of most solar panels) on electricity costs with a 5 kW system in El Paso, TX. We generate this estimate based on real solar quote data from our Marketplace. It considers your system's cost, the federal tax credit, and inflation rates.
