

How much EV charging subsidy for new EV purchasers?

Anhui: 313 USD charging subsidy for new EV purchasers. Among these incentives, investment subsidies refer to subsidies to investment entities based on a percentage of the total investment.

How do construction and operation subsidies affect the electric vehicle industry?

Construction and operation subsidies have complementary effects. Design of the policy mix needs to prevent incentive saturation. With the current booming electric vehicle industry, an insufficient supply of electric vehicle charging infrastructure (EVCI) has become a major barrier to further penetration of electric vehicles.

What are charging subsidies?

Charging subsidies are subsidies provided to EV customers to purchase EVs, which promote the adoption of EVs by local customers and thus increase the demand for charging at local charging stations. The main stakeholders involved in the EVCI deployment process include governments, infrastructure investors, and end-users.

What are the EV charging subsidies in China?

Shandong: Construction subsidies based on 40% of the total investment minus the purchase cost of charging facilities. Beijing: Daily operation subsidy standard is 0.016 USD/kWh. Jiangxi: Municipal subsidy standard is 0.047 USD/kWh. Shanghai: 784 USD charging subsidy for EV consumers. Anhui: 313 USD charging subsidy for new EV purchasers.

Should the government build more EV charging stations?

We study this coordination problem by considering the interactions among the government, automakers, and consumers; our equilibrium analysis yields three major results. First, both the government and the automaker should build extra EV charging stations when their construction costs are independent.

How much financial subsidies will be provided for charging stations?

Financial subsidies will be provided for charging stations at a rate of 20% of the total cost of equipment investment, with special subsidies of 5 million RMB per year. Subsidies not exceeding 400 and 600 RMB/kW for AC and DC CIs, respectively. Subsidies of 150 and 495 RMB/kW for AC and DC CIs, respectively.
