

# Electric car charging stations companies stock

Which EV charging stocks are going public?

Next up, we have another EV charging stock, ChargePoint Holdings. It is an EV infrastructure company that operates one of the largest networks of EV charging stations in the U.S. The company is the first EV charging stock to have gone public via the SPAC route. This came after the completion of its merger with Switchback Energy Acquisition.

Which company has the best EV charging station infrastructure?

Tesla is the leading company in EV charging station infrastructure worldwide and the second leading company in EV charging stations is ChargePoint, with its vast network in North America. It has around 60,000 charging stations in multiple countries to help its customers improve their electric vehicle charging experience.

Should you invest in EV charging station stocks?

Investing in EV stocks that operate charging infrastructure can provide a more affordable way to invest directly in power stations. If you don't own property to install EV chargers, there are EV charging station stocks that you can invest in.

What are EV charger stocks?

EV charger stocks are public shares offered by companies that install, sell, or research electric vehicle chargers. Some of these companies sell electric vehicles, too, with many of them focusing primarily on investments in charging stations. With the rapid adoption of EVs, the industry expects to gain momentum over the next decade.

Are EV charging stocks on the rise?

Even now, as the EV market is on the rise, you can find companies who exclusively create electric cars or are moving to make their whole fleet electric in the list of best automotive stocks on MarketBeat. As these cars become more common, it's natural to expect EV charging stocks to become more mainstream.

Who makes EV charging stations?
