Where can I charge my PEV in Southern California?

Every month, new public charging stations come online where you can plug-in your PEV. To keep residents up-to-date with the region's rapidly expanding DC fast charge (DCFC) network, the South Coast Air Quality Management District (SCAQMD) has developed socalfast: your guide to Southern California's electric vehicle fast chargers.

What is a DC fast charge station?

DC fast charge stations enable rapid electric vehicle (EV) charging in 25 minutes or less. Plug-in on your way to work, during a quick trip to the store, or while grabbing a bite next door. The fast chargers in the socalfast network are supported by two types of connectors: the CHAdeMO and the SAE Combo.

What is a charging station?

Charging Station is a physical address where one or more chargers are available for use. A charging station can be public, shared private, or private. Level 1 chargers use alternating current electricity at 120 volts to provide about 5 miles or less of range per hour of charging.
