

What is a charging station?

Charging Station is a physical address where one or more chargers are available for use. A charging station can be public, shared private, or private. Level 1 chargers use alternating current electricity at 120 volts to provide about 5 miles or less of range per hour of charging.

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.

How do I add EV charging stations?

Add EV Charging Stations Zoom in on the map and click on station markers to review details. Ensure compatibility with your vehicle, then click "Add to Trip" to include it. Repeat the process to add additional charging stops.

How do I find out if a charging station is nearby?

To find out if a charging station is nearby, use ChargeFinder's station page which shows relevant information like charging speed, outlet type, price, and location. Additionally, the "Food and Shopping Nearby" feature helps you find points of interest near the charging station.

How many miles can a car charge a 240 volt battery?

Level 1 chargers use alternating current electricity at 120 volts to provide about 5 miles or less of range per hour of charging. Level 2 chargers use alternating current electricity to charge a plug-in electric vehicle at 208 to 240 volts and can provide about 14 to 35 miles of range per hour of charging.

What is the difference between a charging station and a private Charger?

Private chargers are located at parking space (s) that are privately owned and operated, often dedicated for a specific driver or vehicle (for example, a charger installed in a garage of a single-family home). Charging Station is a physical address where one or more chargers are available for use.

A robust network of public chargers -- akin to the state's more than 8,000 gas stations -- is essential to ensure that drivers will have the confidence to purchase electric vehicles over the next several years. "It is very unlikely that we will hit our goals, and to be completely frank, the EV goals are a noble aspiration, but unrealistic," said Stanford professor Bruce Cain, ...
