

What are the new GB standards for charging systems for electric vehicles?

On September 7, 2023, new GB standards for charging systems for electric vehicles were published. Many components of such charging systems usually require CCC certification in order to be approved for the Chinese market. The new standards are: These have now come into force on 1 April 2024.

What are the EV charging station standards?

Here are some of the main EV charging station standards to know: California Type Evaluation Program (CTEP):CTEP is a state-specific certification managed by the California Department of Food & Agriculture. It is designed to ensure that all EV operators in the state provide a consistent experience and that EV drivers get what they pay for.

Are EV charging stations safe?

But for new station operators, there are many hurdles on the road to safe and compliant installation. From federal regulations to state-specific certifications, there are a number of EV charging station standards safeguarding the installation, management, and maintenance of EV charging stations across the country.

Are EV charging regulations a good thing?

The Wild West days are all but over for the electric vehicle (EV) industry. And in many ways, that's a great thing. As more countries begin transitioning to EVs, new standards, including EV charging regulations, are providing some much-needed guidance for manufacturers, network operators, and solutions providers.

Are EV charging stations regulated in Canada?

Canada's EV charging stations are now regulated under the Electricity and Gas Inspection Act, which provisions for safety requirements and ensures that EV charging stations dispense the stated amount of kilowatts of electricity to a charging vehicle.

What are California's EV charging regulations?

California's CTEP program regulations: The California Division of Measurements Standards came out with a new set of EV charging regulations aimed at making the charging experience more uniform for drivers both in terms of user experience (clear labeling and payment standards) and safety (hardware and operational requirements).
