

How many EV charging stations are there in New Zealand?

All of the charging stations available on our maps are vetted by NZTA - they meet strict requirements of safe, reliable and interoperable stations to be incorporated into the EVROAM database - which then supplies the AA's EV Charge Finder. There are currently over 20,000 EVs registered in New Zealand, and that number will only increase.

Where can I charge my EV in New Zealand?

ChargeNet has a network of more than 400 strategically positioned fast charging points throughout New Zealand, from Cape Reinga to Bluff. This network is expanding, providing EV drivers with a convenient and reliable charging solution. Creating a ChargeNet account is simple, free, and takes just a few minutes.

Does New Zealand have an electric vehicle charging network?

The New Zealand Government, alongside several innovative private companies, has made substantial commitments to establishing a robust charging network across the country, to make electric vehicle charging locations accessible to all. Use the PlugShare database to find suitable charging stations near you, or download the app.

Does New Zealand have a charging station?

The charging network in New Zealand is not a single utility; it comprises multiple operators and payment systems. A charger can be AC (slower, cheaper; most require your own cable) or DC (faster, more expensive, cable not needed). How do I charge an electric car at a public charging station?

How do I find public charging stations in New Zealand?

You can locate public charging stations using apps like PlugShare, ChargeNet, or the New Zealand Transport Agency's EV Roam tool. These apps provide real-time data on station locations, charger types, availability, and sometimes even the cost of charging. They often include navigation features to help you find the nearest station quickly.

What type of charger is used in New Zealand?

The most common connectors in New Zealand are Type 2 for AC charging and CCS or CHAdeMO for DC fast charging. Are public charging stations powered by renewable energy?

Depending on your vehicle, a 150kW charger can add 100km to your range in as little as 13-16 minutes. Noting that if you have an older or lower-range EV, your charging speed will be limited by your vehicle's internal charging capacity, so ...
