

Are there public EV charging stations in Yellowstone?

Yes, public EV charging stations are now available in a number of park locations in Yellowstone. The stations are Level 2, UL-listed, work with all J1772 compliant vehicles, and provide 208/240 volt electric service.

Does Yellowstone have electric charging?

While Yellowstone's 3,400 square miles may seem daunting, believe it or not, our nation's first national park has more electric charging opportunities than gasoline and diesel stations. These six stations are J-1772 Level 2, with 208/240 volt electric service. You'll be fully charged in four hours.

Where is the Yellowstone charging station located?

Yellowstone Forever, the park's official nonprofit partner, installed one of the public charging stations at their headquarters and retail store at 308 E Park St. Gardiner, Montana 59030. These provide free power to anyone who brings an electric vehicle or plug-in hybrid to Yellowstone.

Where can I charge my electric car in Yellowstone National Park?

To the east, Mountain Pine Motel, Heart of Glaciers RV Park & Cabins and St. Mary Glacier Park KOA have NEMA 14-50 outlets. Take an electric road trip through Yellowstone, Grand Teton and Glacier national parks by using these charging stations.

Can electric cars be used in Yellowstone National Park?

There are many cases for which plug-in hybrids are appropriate for work in Yellowstone and could reduce our gasoline needs considerably. Tesla stations are also located in West Yellowstone. In addition to public facilities, the program provided electric vehicles and charging stations for National Park Service operations.

Are Yellowstone electric stations UL compliant?

The electric vehicle charging stations in Yellowstone are UL-listed, providing 208/240 volt electric service with a 32A (7.7 kW) charging amperage. They are Level 2 stations that work with all J1772 compliant vehicles and offer free power to electric vehicles and plug-in hybrids.
