

What is Eve's new generation of LFP batteries?

Based on the advanced technology and profound production experience, we launched 46-series cylindrical cells and cylindrical LFP cells in 2021. In 2022, EVE launched a new generation of large LFP battery, lithium metal secondary battery, sodium-ion battery, solid state battery and fuel battery.

What is Eve battery?

Eve Power Co.,Ltd. is a national high-tech enterprise specializing in the innovative development of lithium batteries. Their primary lithium battery holds the leading position in China, and their ER battery ranks the top in the world.

Is Eve a lithium battery company?

EVE was founded in 2001 and started to produce and sell lithium primary batteries in 2003. In 2009, it was listed on Shenzhen GEM with primary lithium batteries as its main business, and it was one of the first 28 companies listed on Shenzhen GEM. The capital market endorsement provides strong support for the development of lithium-ion battery.

What is the power battery installation capacity of Eve?

In the first half of 2021, Eve achieved a power battery installation capacity of 0.87GWh, ranking 10th in the world. In the field of automotive power battery, Eve is one of xiaopeng's core suppliers.

What is Eve Gigafactory?

In 2022, EVE launched a new generation of large LFP battery, lithium metal secondary battery, sodium-ion battery, solid state battery and fuel battery. In Feb 2023, the construction of "60 GWh Gigafactory" started. The energy storage battery business has developed rapidly that its global shipments rank global Top 3 from in 2023.

Are EV batteries lithium ion?

Yes, EV batteries are most likely lithium-ion. A common misconception surrounding lithium-ion batteries is that they are made exclusively of lithium, but this is not the case. The batteries in your EV are composed of various other components, one of the most important being cobalt.

Based on the advanced technology and profound production experience, we launched 46-series cylindrical cells and cylindrical LFP cells in 2021. In 2022, EVE launched a ...
