

Who is EVE Energy?

EVE Energy's First Regional Headquarters Officially Unveils! To be the most creative lithium battery leading company and continuously overcome the core technical issues.

Who is Eve batteries?

EVE is now a globally leading high-quality lithium battery company, covering four major business segments: consumer batteries, power batteries, energy storage batteries, and industrial chain strategic collaboration. Batteries are widely used in the fields of the IoT and the Energy Internet.

Who makes EV batteries?

EVE Energy Co., Ltd., founded in 2001 in Huizhou, China, is a leading lithium-ion battery manufacturer. Specializing in batteries for electric vehicles, energy storage, and consumer electronics, it partners with brands like BMW and Tesla.

What makes Eve Energy batteries unique?

EVE Energy's batteries feature innovative cooling solutions, including composite superconducting phase change technology, ensuring consistent performance and safety. With a focus on both current needs and future advancements, EVE Energy is working on solid-state battery technology, aiming for breakthroughs by 2026 and 2028.

What is EVE Energy's LFP battery technology?

The company has developed high-capacity LFP cells, such as the "Mr. Big" series, which surpasses industry standards with capacities exceeding 600Ah. In addition to LFP, EVE Energy is exploring sodium-ion battery technology as a cost-effective alternative to lithium-ion batteries.

What is the production mode of EVE Battery?

EVE Battery adopted highly automated and information-based production mode to provide customers with high quality and high reliability lithium battery products and services. In recent years, EVE Battery can focus on the power and energy storage market and adopt this mode.
