

What are the types of LiFePO₄ batteries offered by evlithium?

Evlithium offers high-quality 3.2V prismatic LiFePO₄ Battery cells (LF50K,LF105,LF280)in cooperation with EVE Cells. Get the most out of your energy needs with EVE Batteries and eve cells. Power up with our high quality LiFePO₄ batteries for efficient, reliable and economical power!

What is EVE Battery?

EVE Battery is a company that produces lithium iron phosphate batteries. After nearly 19 years of hard work, their batteries are sold worldwide. In recent years, they have focused on the power and energy storage market and adopted a highly automated and information-based production mode to provide high quality and high reliability lithium battery products and services.

Why should you choose Eve battery series?

All series can maintain stable operation in safe and efficient way. EVE will adhere to innovation-driven development and fully take the advantages of its cylindrical battery solutions to provide high-quality, high-safety, high-reliability, and long-life cylindrical cells to empower a better smart life.

What is the production mode of EVE Battery?

EVE Battery adopted highly automated and information-based production mode to provide customers with high quality and high reliability lithium battery products and services. In recent years, EVE Battery can focus on the power and energy storage market and adopt this mode.

What are the advantages of Eve cylindrical battery solutions?

EVE's cylindrical battery solutions have unique advantages of economy and intrinsic safety, extreme standardization and reliability. The products are widely used in power tools, garden tools, vacuum cleaners, electric two-wheelers, portable energy storage systems and other fields.

What happened to Eve cells in 2024?

Many new cells have arrived in 2024 Special notes - EVE has been slightly inconsistent with its published data in regards to cycle life and current rates. In 2024, the C rate was changed to the P rate, which is slightly different technically on the new models. Traditionally LF280 & LF304 were rated for 1C to 3500 and 4000 cycles.
