

Do Eve smart blinds need a battery?

Instead of removing a battery, as found with most other smart blinds, Eve stuck a USB-C port in the frame of its smart blinds. Now look at the closest window in your home and imagine trying to plug in the top of your existing curtains to the nearest outlet. That's not a pretty thought at all.

Are Eve motion blinds smart?

The Eve Motion Blinds themselves are well designed too. They look like any modern roller shades at first glance. Look closer and you'll see two small aspects telling you these are smart blinds. One is a USB Type-C port, used to charge the blinds, and the other is a small QR code for HomeKit.

Do Eve motion blinds work with HomeKit?

Overall, the Eve Motion Blinds are relatively quiet and smooth. Having not used other smart blinds, I can't compare their sound or speed. Since these work with HomeKit though, I did test scheduling and automation. Note that if you don't have a Thread network, the blinds also support Bluetooth.

Why should you choose Eve motionblinds with Matter?

Easily set schedules that automate your blinds to suit your daily routine. Increase comfort and energy efficiency in your home without replacing your existing blinds. The award-winning Eve Motionblinds with Matter makes upgrading your blinds effortless with easy retrofittable DIY installation into virtually any blind tube.

Does Eve's New motionblinds really work?

Eve's new MotionBlinds solve most of those problems in one excellent package. Before we get into the full review, though, I want to cover a moment of transparency. This is the second review unit Eve sent me. The first didn't work on arrival, every attempt to set up the blinds failed.

Are Eve roller blinds Sleepy?

Unlike other Thread devices in my house, the Eve Roller Blinds have "Sleepy" capabilities with a 5000 milliseconds (5 seconds) interval. Given that the motors use more power than a sensor alone, I can understand this configuration. And smart blinds don't necessarily need the instant response of a light switch.

Eve Motionblinds, the first connected blinds and shades motors in the market to support Thread, are now available. ... motorized blinds available to a broad audience and widely embraced as ...

The Eve MotionBlinds motorize your window coverings with a rechargeable battery, enabling control via app, Siri, or manual pull, and are compatible with the Matter standard through Bluetooth and Thread technology.
