

Does Eve University give a bonus to capacitor capacity?

Mindflood Booster gives a bonus to capacitor capacity. Antipharmakon Aeolis gives a bonus to capacitor capacity. EVE University members can get full reimbursement for most of these skills, among many others, through the University skillbook program. Capacitor Management - 5% bonus to capacitor capacity per skill level.

Do Eve University members get full reimbursement for skills?

EVE University members can get full reimbursement for most of these skills, among many others, through the University skillbook program. Capacitor Management - 5% bonus to capacitor capacity per skill level. Capacitor Systems Operation - 5% reduction in capacitor recharge time per skill level.

Does Eve have a Powergrid?

Every ship in EVE has an internal generator, which provides the "powergrid" you see in the fitting window. Modules fitted onto the ship connect to the powergrid and reserve a portion of the generator output for themselves, reducing the remaining powergrid when fitted.

What is a capacitor & how does it work?

Your capacitor is the energy your ship has to run modules. It continually regenerates but some modules are very power hungry and will use more than your ship makes. The fitting window gives you an idea of this by telling you how long your capacitor will last when all your modules are on.

Does a capacitor boost work in PvP?

Cap-boosted fits can work well in some types of short, high-stakes PvP combat, but are usually ill-suited (and ISK-inefficient) in sustained PvE combat. The capacitor passively recharges from onboard generator power and requires no extra "fuel".

What happens if a capacitor is 'stable'?

If a capacitor is 'stable', then even with every capacitor-consuming module running non-stop, your capacitor energy level will eventually drop down and fluctuate between the percentage level displayed, indefinitely, with the total drain on the capacitor balanced out by its recharge rate.

Back in 2012 they were given a new function that randomly reflected Nos and Neut effects back at the attacker. Although it is helpful in niche situations, this bonus has significant ...

If you go for barely cap stable, and small booster sizes with short cycle times, you will probably only be stable near the peak capacitor recharge rate (which is when the actual ...

Also for the list of defense against neutralisers, don't forget that Capacitor Batteries not only increase cap storage, but reflect some of the energy drain back on the attacker - ...

I was wondering if anyone knew, in detail, the way that cap batteries reflect neuting/nosing. For example, if I have a battery fitted, and I get neutered, is that 12.5% reflection ...

EVE allows you to discover, explore and dominate an amazing science fiction universe while you fight, trade, form corporations and alliances with other players. ... - ...

Does anyone use these? Compared to capacitor boosters you really don't get alot of bang for your buck. A small cap booster is 5 pg and 15 cpu to fit. A small cap battery is 10 ...

Capacitor warfare is the attack strategy of using equipment to drain a target ship's capacitor, its available energy for powered modules. A ship without sufficient capacitor energy can lose the ability to fire certain weapons, actively ...

my ship has a bad capacitor time because I fitted too much guns on it. I have a small cap battery in my mid slot and when I use it, it have little to no effect on my ship. is there ...
