

How can I charge my EV faster?

To enable you to charge your electric vehicle faster and get the most out of your EV's charging capacity, we recommend the use of a Level 2 charging station. Provincial and municipal incentives are available in some regions to help cover the cost of purchasing and installing these charging stations.

Can I charge my eV at a fast-charging station?

Thanks to a CCS adapter, it's now possible to charge your EV at any fast-charging station. The Tesla connector is fitted to certain Level 2 chargers and Tesla Supercharger fast-charging stations. Long EV journeys have never been so easy!

What is a DC fast charging station?

A DC fast charging station, also known as DCFC or 'level 3', is the fastest way to charge your electric vehicle. It's important to note that not every EV can charge with level 3 chargers.

How can I find the right EV charging station?

Use the charging map in the ChargePoint app to find the right EV charging station for you. Filter stations near you, drive up, plug in, and enjoy the amenities nearby. With the largest global EV charging network, including ChargePoint and roaming partner stations, finding the right station is easy, affordable, and convenient.

Are there public charging stations for electric cars?

Yes, there are three levels of public charging stations for electric vehicles. All vehicles can be connected to either a Level 1 or Level 2 charging station, which have the same charging capacity as those you can install at home.

How fast does a Level 2 charging station charge an EV?

Level 2 charging stations charge your EV 3 to 7 times faster depending on the model of the charging station, as well as your electric vehicle and its battery capacity. These chargers require a 240-volt outlet.

Vast network of electric car charging stations in France. Power your EV across France with the easyCharging app from the iconic streets of Paris to the scenic routes of Provence and the bustling hubs of Marseille and ...
