

Federal government electric car charging station

Will government owned vehicles be able to charge at EV charging stations?

"Neither Government Owned Vehicles nor Privately Owned Vehicles will be able to charge at these charging stations once they're out of service," it concludes. At the GSA's Denver office, employees were told that EV chargers at four federally owned buildings would be taken offline next week. The news was first reported by Colorado Public Radio.

Will federal EV chargers be shut off?

A Nissan LEAF recharges at a station in Pasadena, Calif. Memos obtained by NPR show a key federal agency has paused orders of zero-emission vehicles and some federally-owned EV chargers will be shut off. The Trump administration has halted much of the federal government's adoption of electric vehicles into its massive fleet of cars and trucks.

How many federal buildings have electric vehicle chargers?

More than 800 federal buildings, such as those for national laboratories, Veterans Affairs, NASA and military bases, offer electric vehicle chargers, according to a database of alternative fuel stations hosted by the U.S. Department of Energy.

Will the GSA remove EV charging stations?

The GSA did not confirm that it would remove charging stations. According to the GSA's acting press secretary, Will Powell, as of Feb. 27 the GSA was still working to confirm whether car charging stations are "mission critical," and the agency has not yet taken action regarding EV chargers at federal buildings across the U.S.

Are EV charging stations 'mission critical'?

According to the GSA's acting press secretary, Will Powell, as of Feb. 27 the GSA was still working to confirm whether car charging stations are "mission critical," and the agency has not yet taken action regarding EV chargers at federal buildings across the U.S. His full statement, sent via email, read as follows:
