

Why choose a solar floating fountain pump?

Our solar floating fountain pumps offer a great mix of mother nature and manmade machinery. They create a water spray, making the surrounding water environment ripple with beauty and ease. Additionally, they help oxygenate your pond and prevent algae buildup.

How does a traffic solar fountain work?

Traffic solar fountain floats on water and needs no electricity, but runs automatically under the sunlight. It is suitable for small pond, garden, pool, lawn, patio, fish tank and water circulation in order to get more oxygen.

What is the best solar powered fountain pump?

Rather than a standalone water feature, the AISITIN 6.5W Solar Fountain Pump is the best solar powered fountain for anyone with a water feature already in their garden. And this doesn't just mean ponds - the AISITIN can float in any body of water larger than its dimensions of 9.09 x 8.86 x 1.85 inches.

Does a water fountain have a solar panel?

The water circulates through five tiers of ceramic bowls and, unlike many of the other fountains on this list, has an external solar panel. This feature means you can hide the panel, or position it to get better sunlight than the fountain's position allows, giving you a little more flexibility.

How many solar water fountains are there?

Why stop at solar floating fountains? Join the rest who have used our selection of over 235 solar water fountain products both small and large. Installing a floating solar fountain is quick and easy, with most products coming mostly assembled.

How do solar floating fountain pumps help prevent algae?

Our solar fountain pumps allow for a great mix of mother nature and manmade machinery and create a water spray making the surrounding water environment ripple with beauty and ease. These lights and fountains are also great for oxygenating to your pond and preventing algae from building up.
