How good is the Focusrite solo XLR?

The Solo's A/D converter captures audio at 24-bit depth and has a maximum sample rate of 192 kHz. It also has a fairly respectable dynamic range, reported at 111 dB, 110.5 dB, and 110 dB for the XLR-in, line input, and instrument input, respectively. As a custom, the unit features Focusrite's signature Air mode on the preamp for the XLR input.

However, it's also a requirement for some microphones that do not fall into these categories, such as the Sontronics SIGMA 2. Before enabling phantom power, please consult the microphones' documentation, as
