

Does CATL sell EV batteries?

Nio is already one of CATL's largest EV battery customers, though it has existing supply agreements from other battery makers such as BYD. Nio's importance to this new partnership is its battery swap technology, which it operates as part of a Battery as a Service (BaaS) program for its cars.

Will Ford get LFP batteries?

Ford will receive LFP batteries from CATL's Chinese factories that will go into standard range Mustang Mach-e's later this year and Ford F-150 Lightnings starting in 2024. Ford is communicating that it needs to use two separate battery chemistries for two separate use cases.

Does Ford have a battery plant in Michigan?

Ford said it will collaborate with a Chinese supplier on a new \$3.5 billion battery plant for electric vehicles in Michigan, despite ongoing tensions between the U.S. and China. The plant is expected to open in 2026 and employ about 2,500 people, according to the Detroit automaker.

Did Ford invest \$3.5 billion in a new EV battery plant in Michigan?

Ford's announcement that it is investing \$3.5 billion in a new EV battery cell plant in Michigan using technology from China's CATL has caught the attention of Republican senators and representatives who called for a federal review of the agreement.

What is Ford's new lithium-ion battery plant?

The new LFP plant is in addition to Ford's collaborations with LG Energy Solution and South Korea-based SK, including a joint venture for twin lithium-ion battery plants in Tennessee and Kentucky. Those plants are expected to come online in 2025 and 2026.

When will Ford Motor's new battery plant open?

The plant is expected to open in 2026 and employ about 2,500 people, according to the Detroit automaker. DETROIT - Ford Motor said Monday it will collaborate with a Chinese supplier on a new \$3.5 billion battery plant for electric vehicles in Michigan, despite tensions between the U.S. and China.

The future Ford BlueOval Battery Park Michigan plant is currently under construction in the town of Marshall, where it will begin producing lithium-iron phosphate (LFP) ...

Contemporary Amperex (Shanghai) Intelligent Technology Co., Ltd. ("CATL Intelligent Tech" for short) is a world-leading new-energy technology company, committed to providing battery-based CIIC (CATL Integrated ...

The world's biggest maker of electric-car batteries, China-based Contemporary Amperex Technology Ltd (CATL), will provide technology to Ford Motor's planned \$3.5 billion electric-vehicle (EV) battery factory in

Michigan.

Chinese components manufacturer CATL currently provides EV batteries to automakers like Ford and Tesla, but now the U.S. government is warning against relying on ...

In March, Ford announced a \$3.5 billion investment in a new EV battery plant, licensing technology from CATL to produce lithium-ion phosphate (LFP) batteries. 2 The ...

Ford is doubling down in its partnership with Chinese-based battery manufacturer CATL to build small, affordable electric vehicles in the US. ... Ford's \$3.5-billion EV battery factory going up ...

Ford today announced a significant move to LFP batteries for its electric vehicle line. The Dearborn company is tapping China's CATL first for Chinese LFP batteries and then technology...

Regardless, at least for now, the future BlueOval Battery Park Michigan site will use licensed lithium iron-phosphate battery (LFP) technology from CATL to build those same ...

On March 17, 2025, CATL and NIO signed a strategic partnership in Ningde, Fujian. Together, the two parties will jointly build the world's largest battery swapping network and promote the standardization of industry ...

Ford's \$3.5 billion plant in Michigan will draw on technology from CATL, a Chinese company that is the world's No. 1 maker of electric-car batteries.

Ford is doubling down in its partnership with Chinese-based battery manufacturer CATL to build small, affordable electric vehicles in the US. Ford's \$3.5-billion EV battery factory going...

U.S. Senator Marco Rubio on Thursday introduced legislation that takes aim at Ford Motor's deal to use technology from Chinese battery company CATL as part of the ...

Auto-giant Ford is facing renewed scrutiny over its controversial partnership with Chinese electric vehicle (EV) battery maker Contemporary Amperex Technology Co. (CATL), after the United ...

Ford's announcement that it is investing \$3.5 billion in a new EV battery cell plant in Michigan using technology from China's CATL has caught the attention of Republican senators and...

Trump's pick for secretary of State, Marco Rubio, has led efforts to block a \$3 billion EV battery plant partnership between CATL and Ford Motor Co. in Marshall, Mich. As the ...

CATL - the world's largest producer of electric vehicle batteries - currently supplies a number of automakers with those units, and will also license lithium-iron phosphate battery technology to Ford, which the automaker will ...

Ford is pausing construction on a \$3.5bn plant in Michigan where it planned to make batteries for electric vehicles using technology from a Chinese company, amid controversy over the plan and an ...

Ford will receive LFP batteries from CATL's Chinese factories that will go into standard range Mustang Mach-e's later this year and Ford F-150 Lightnings starting in 2024.

In addition to supplying LFP-based CTP batteries to Ford, CATL intends to actively cooperate with Ford with respect to other battery technologies. The elevated global strategic ...

Discover key insights from our interview with CATL on battery innovations, industry challenges, and future advancements in recycling, V2G technology, and global electrification.
