

When will Ford Motor's new battery plant open?

The plant is expected to open in 2026 and employ about 2,500 people, according to the Detroit automaker. DETROIT - Ford Motor said Monday it will collaborate with a Chinese supplier on a new \$3.5 billion battery plant for electric vehicles in Michigan, despite tensions between the U.S. and China.

Will Ford build an electric car battery plant in Michigan?

Ford Motor Co. recently announced plans to invest \$3.5 billion to build an electric car battery plant in Michigan with Chinese partner Contemporary Amperex Technology Limited (CATL)--the world's number 1 maker of electric-car batteries with 13 factories in Europe and Asia.

Where is Ford launching a new battery plant?

Ford CEO Jim Farley at a battery lab for the automaker in suburban Detroit, announcing a new \$3.5 billion electric vehicle battery plant in the state to produce lithium iron phosphate batteries, Feb. 13, 2023.

Why did Ford build LFP batteries in Michigan?

Ford built a battery plant in Michigan to produce LFP batteries in order to obtain significant U.S. battery manufacturing subsidies from the Inflation Reduction Act. This could help Ford hit a goal of 8 percent profit margins on its EV operations by 2026, as the IRA ties a significant share of federal subsidies to domestic production and raw materials content.

Will Ford get LFP batteries?

Ford will receive LFP batteries from CATL's Chinese factories that will go into standard range Mustang Mach-e's later this year and Ford F-150 Lightnings starting in 2024. Ford is communicating that it needs to use two separate battery chemistries for two separate use cases.

Where are Ford batteries produced?

Ford is building a battery plant in Michigan with SK On (previously known as LG Chem). They are also building two other battery plants, in Tennessee and Kentucky, with the same partner.

Though it has faced its fair share of trials and tribulations over the past couple of years, the Ford EV battery plant known as BlueOval Battery Park Michigan continues to take shape, and was still repeatedly on track to begin ...
