

What is the world's first solar road in Normandy?

French officials have opened the world's first solar road in the region of Normandy, unveiling a 1-kilometre-long (0.6-mile-long) route covered in 2,880 photovoltaic panels. The trial roadway, called Wattway, passes through the small town of Tourouvre-au-Perche.

How much does it cost to build a solar road in France?

The road's construction is part of a push by French ecology officials to install 1,000 kilometers of solar roads throughout the country within the next 5 years. Constructed at a cost of EUR5 million (about \$5.2 million), directors view the project not as a finished product but as the next step in the development of the technology.

Will France introduce the world's first solar road?

France has introduced the world's first solar road. This road will be a 2-year-long test, and possibly a clean energy solution for all roads in the world. Jessica Stewart is a Contributing Writer and Digital Media Specialist for My Modern Met, as well as a curator and art historian.

Where is the world's first solar panel road located?

The world's first solar panel road has officially opened in a small village in Normandy, France. Built in the small village of Tourouvre-au-Perche, the 1 kilometer route, dubbed the "Wattway," is covered in 2,800 square meters of photovoltaic panels.

How many solar panels are there in Tourouvre-au-Perche?

It features 2,880 solar panels over 1 kilometer (0.62 miles) in the small village of Tourouvre-au-Perche. The energy efficient road was built with Colas' Wattway technology, which is installed directly on existing pavement. It's designed to provide enough energy to power street lighting for the 3,400-person village in Normandy.

Will a 1,000 kilometre solar road provide electricity to 5 million people?

Whether that's going to happen or not will depend on how well this two-year trial goes, and if the costs do come down, then it's definitely something worth aiming for: 1,000 kilometres of solar roads would provide electricity to around 5 million people- about 8 percent of France's population.

From France. Maturity stage TRL 6 / 7 - Prototype demonstration 1:1. This is a breakthrough innovation that provides road networks with a second function: the production of renewable energy. Solar road panels are used to power any ...
