

Is Freewire partnering with GM energy?

Budding EV charging developer FreeWire Technologies gained a significant player in the automotive industry to help get its turnkey charging solutions out to more customers. Today, FreeWire shared that it has partnered with GM Energy to help deploy the former's ultra-fast EV chargers to commercial and fleet customers in the US.

Does Freewire offer fast EV charging?

FreeWire offers the only commercially available battery-integrated fast EV charging solution in the U.S. Due to its innovative design, the Buy America compliant Boost Charger 150 utilizes existing grid infrastructure, reducing deployment timeframes to days instead of months and lowering EV charging energy costs by up to 70%.

Who is Freewire technologies?

Although we've only been following FreeWire Technologies for the past year or so, the EV fast charging and energy management solutions company was founded in 2014. During its decade-long tenure, it has been helping expedite the world's transition to electric vehicles by developing more efficient charging solutions.

Will Freewire boost Chargers help GM energy's energy management ecosystem?

By integrating its Boost Chargers into GM Energy's energy management ecosystem, FreeWire hopes it can provide more US customers with an easy solution for electric transportation- especially those customers who may not have the local grid capacity, funding, or permitting requirements to install a more traditional charging pile.

Why is Freewire launching a new research & development facility?

The news coincides with the groundbreaking of FreeWire's new research and development (R&D) facility in Newark, California. The facility will enable acceleration of new ultrafast charging and energy storage product offerings, and support FreeWire's growth following a year of exceptionally strong demand.
