

How do you charge an EV at a gas station?

While charging an EV is different from refueling your car at a gas station, expanding infrastructure means that EV charging has never been easier. The basic steps of recharging your EV at a public station are: Pull the car up to the charger. Turn the car off. Plug in a fuel-supply cord.

How do I find electric vehicle charging stations?

Google Maps also has an Electric Vehicle Charging category you can select. Each app shows the number, type, speed, and sometimes photos of each charging station location. Some apps have live data about which stations are available at that moment. Have a backup plan.

How do EV charging stations work?

In most states, charging stations are only allowed to charge by the minute, not by the amount of electricity used. Each network will send you an RFID card to use for billing. Networks also have mobile apps that allow you to activate and pay for EV charging from your phone. Charging speeds slow down dramatically when the battery reaches 80%.
