

Does G-Shock use solar power?

G-SHOCK uses solar power to keep your timepiece charged all day long. Shop our collection of solar-powered digital watches and soak up the sun with the digital timepiece that will never stop ticking. Choose G-SHOCK for the most durable digital and analog-digital watches in the industry.

Why should you buy a G-Shock solar powered watch?

G-SHOCK's Tough Solar technology converts light into power to keep your watch ticking. It's environmentally friendly and eliminates the need for battery replacements. Plus, G-SHOCK Solar Powered watches have a power reserve of up to 2 years, making them a hassle-free timekeeping solution.

Can Tough Solar G-Shocks charge in low light?

G-Shocks with solar don't need direct sunlight to charge. Even if you work underground or mostly indoors, the light coming from the lamps will be enough to keep the battery going. There is a small solar panel inside the face of the Tough Solar G-Shocks.

How much did a Tough Solar G-Shock used to cost?

In the past, Casio's Tough Solar technology was only available in their high-end "Master of G" line. If you wanted a tough solar G-Shock, you could expect to pay at least \$200.

How long does the power reserve last on a G-Shock solar powered watch?

G-SHOCK Solar Powered watches have a power reserve of up to 2 years. No matter what challenge lays ahead, G-SHOCK's Tough Solar technology converts any light source (artificial or natural) into power that keeps your timepiece ticking. Environmentally friendly and hassle-free - make replacing a battery a thing of the past.

Do G-Shocks with solar need direct sunlight?

G-Shocks with solar power do not require direct sunlight to charge. Even if you work underground or mostly indoors, the light from lamps will be enough to keep the battery going. This makes G-Shocks with solar power extremely versatile, as exposure to daylight is enough to keep the battery full.
