

Does GAF offer a solar-powered roof vent?

Yes, GAF offers a solar-powered roof vent. The Master Flow®; Green Machine(TM) Solar-Powered EcoSmart Roof Vent requires no extra wiring or electricians, and is fully solar-powered to reduce electricity costs.

How does a solar roof vent work?

The Master Flow(TM) Green Machine(TM) High Power Solar Roof Vent, Solar Powered Model PRSOLAR2, uses the sun's power to help reduce damaging heat and moisture in the attic. It does this by solar power eliminating energy costs associated with operating a purely house-powered unit.

What is the ERVSOLAR roof vent?

The Master Flow(TM) Green Machine(TM) Solar Powered Roof Vent - ERVSOLAR - is a solar-powered attic vent that uses the sun's power to help reduce heat and moisture in the attic. It eliminates energy costs associated with operating a house-powered vent.

Does GAF offer solar shingles?

GAF has designed a solar shingle that can be easily installed by roofing contractors, making the overall process easier for homeowners. Normally, homeowners need to contact two separate companies to install their roofs and solar panels. GAF offers complete roof replacements that include solar shingles, similar to how Tesla Solar Roof works.

How does GAF energy solar work?

The more you produce and use your own electricity, the less you purchase. Over time, GAF Energy solar may even pay for itself AND your new roof, via monthly electric bill savings and government incentives. You may also get credit for solar energy you send back to the grid when your panels produce more power than your home uses.

Will GAF Energy contact me if I need a solar roof?

By providing your phone number, you authorize GAF Energy to call or text you to discuss your need for solar and roofing products or services. Your consent to this agreement is not required to purchase products or services.
