

How can a gas station become a fast-charging EV station?

The easiest way to transition a gas station to a fast-charging EV station is to test the waters by replacing one fuel dispenser with an EV charging dispenser, causing the least disruption possible. To attract EV drivers, gas stations must offer ultrafast charging technology, faster than L3.

How much does electric car charging cost?

Gas stations making the switch to electric vehicle charging will be investing in Level 3 chargers, which are the most powerful and generally charge in 20 to 30 minutes, but for multiple units can incur investment costs between \$500,000 to \$1 million.

How will EV charging impact gas stations and fuel retailers?

Gas stations and fuel retailers are in a leading position to capture new opportunities by reimagining themselves in the face of current disruption caused by the shift to electric vehicles*. EV charging will play a major role across all types of fuel retailers globally.*

Is EV charging a good idea for in-town gas stations?

According to the U.S. Department of Energy, 80 percent of EV charging happens at home, which makes adding EV charging less appealing for in-town gas stations, Hughes said. Local gas stations also don't generally have amenities to keep people entertained while they are charging their vehicles. Real estate can also be prohibitive.

Are gas stations scrapping EV charging stations?

As electric vehicles proliferate, some gas stations are making expensive overhauls to add EV charging stations. In most cases, they aren't scrapping traditional liquid fuel pumps. But select locations, including an RS Automotive in Takoma Park, Md., and a Shell station in Fulham, England, have made a full switch.

How long does it take to charge a car at a gas station?

Locations like office complexes, hospitals and hotels typically offer a slower charging option, since people generally stay put for hours at a time. Gas stations, however, are investing in Level 3 chargers, which are more powerful and generally charge a car in 20 to 30 minutes.

Gas stations making the switch to electric vehicle charging will be investing in Level 3 chargers, which are the most powerful and generally charge in 20 to 30 minutes, but for multiple...
