

## Gasoline generator running electric car charging station meme

Is an electric vehicle charging station powered by a diesel generator?

An electric vehicle charging station in Australia's outback is entirely powered by a diesel generator. False. Solar panels on the station's roof are the initial power source. The generator is only used as a backup. A viral video claims an electric vehicle (EV) charging station in Australia's outback is powered entirely by a diesel generator.

Will a diesel fuel generator work for EV drivers in remote areas?

A 2018 photo of an electric vehicle charging station powered by a diesel fuel generator was part of a test by an Australian to see whether it would work for EV drivers in remote areas without a network of charging stations. Most EV drivers in the U.S. recharge their vehicles at home or at a growing network of charging stations across the country.

Does Australia's EV charging station use a generator?

The generator is only used as a backup. A viral video claims an electric vehicle (EV) charging station in Australia's outback is powered entirely by a diesel generator. This is false. The off-grid prototype station uses solar panels as its initial energy source, with the generator included as an emergency backup.

Does a 2018 photo of an electric vehicle charging station show hypocrisy?

A 2018 photo of an electric vehicle charging station powered by a diesel fuel generator is popping up on social media again, with users claiming it shows the hypocrisy of environmentally focused drivers. "Electric charger powered by diesel generator," read a Feb. 25 Facebook post showing a photo of an electric vehicle charging station.

Is a 'mobile electric vehicle charger' a gas-powered generator?

The 'Mobile Electric Vehicle Charger' in the image is not a gas-powered generator, but a mobile power bank. Perl Heidi with OAMTC confirmed this to USA TODAY via email, stating that it 'consists of several lithium cells and can deliver electricity for about twelve kilometers (7.5 miles) to an electric vehicle'.

Can You charge an electric car with a generator?

He has since changed the fuel source to vegetable oil waste instead of gas for other charging stations he created. It is possible to charge electric vehicles with a gasoline-powered generator, but that's not how most drivers in the U.S. do so. Most people simply plug into an outlet at home overnight, the Department of Energy said.

A video of a diesel generator being used to power electric-car chargers has gone viral on social media, but the motoring association behind the chargers insists it's merely a 'backup' solution for ...
