

Does Georgia Power have a bill calculator?

DISCLAIMER: The Georgia Public Service Commission ("Commission") makes this bill calculator available so that residential consumers can check the accuracy of electric bills that they receive from Georgia Power Company ("Georgia Power").

How many kW is a solar system in Georgia?

Georgia Power sets the following size limits for residential and commercial solar systems: residential systems are limited to 10 kW and commercial systems to 250 kW. Georgia Power is part of the Southern Company, which is the state's largest utility.

Does Georgia Power pay for excess solar power?

Georgia Power does not pay customers the full retail rate for excess solar power sent back to the grid. Instead, they compensate customers at the avoided energy rate, which is equivalent to the amount that the utility would otherwise pay to buy the power on the open market.

How does Georgia Power's Solar Program work?

Georgia Power's Solar Program helps maximize savings by encouraging the use of solar electricity at home. This reduces the amount of electricity sent back to the grid.

What is a utility bill calculator?

The utility bill calculator is a resource that the Commission is making available that allows a consumer to check the accuracy of his/her monthly electric bill. A bill calculator has been prepared for customers of the Georgia Power Company.

Can I Sell my solar energy back to Georgia Power?

Customers connected to the grid with home solar systems in Georgia can sell their excess electricity back to Georgia Power for bill credits. Any excess solar energy generated in a month will carry over to the next month.
