

Can you buy solar power in Peach State?

Residents of the Peach State who can't put solar on their own roof can still buy solar power. Community solar projects -- essentially large solar farms -- allow utility customers to subscribe to a piece of the output of the solar energy, and in return potentially receive lower electricity bills.

Does Georgia Power have a simple solar program?

Since January 2017, Georgia Power's Green Energy program has been replaced by the Simple Solar Program. This program allows customers to support and foster the growth of solar energy in Georgia by having Georgia Power purchase and retire Renewable Energy Credits (RECs) generated from solar energy resources on their behalf.

Does Georgia have a solar incentive program?

Unlike many states that give residents money or tax credits to offset the cost of solar, Georgia does not have any statewide incentive programs of this type. It's best to look to programs run by local communities or utility companies for financial help.

Does Georgia Power offer a green energy program?

Georgia Power is directed by the Commission to file a proposed Green Energy Program that would allow customers to purchase green energy at an established price. This program would not impact the bills of customers who choose not to participate.

How much does a 5 kW solar panel cost in Georgia?

In Georgia, the average cost for a 5 kW solar panel system is around \$13,160. Once you factor in the 30% credit, the cost of a solar panel system in Georgia comes down to \$9,212. When you file your taxes, you can claim this incentive as a credit towards your federal tax bill.

Does Georgia Power offer free energy upgrades?

Georgia Power's Energy Assistance for Savings & Efficiency (EASE) program can get you free energy upgrades if your household income is 200% or less of the 2023 US Federal Poverty Guidelines. The program covers energy-efficiency projects such as:
