

How do I Go Solar for my home?

The most common way to go solar for homeowners is the installation of panels on their roofs. These systems can be purchased directly through an installer (or assembled for the DIYers) as a large cash purchase or through relatively affordable financing (such as a 1.99% APR 15-year loan).

Are solar panels right for my home?

We have the answers to all your burning questions to help you decide if solar panels are right for your home. Solar panels can generate cheap and clean energy. Here is everything you need to know. Throughout the country, residential solar panels have become an increasingly popular option for generating energy for homes.

Can solar panels power a home?

Yes, solar panels can power a home. They are used to power everything from calculators to sports stadiums to satellites.

Is installing solar panels at home a good idea?

Home solar is a step toward energy independence and gaining control over your energy costs. Without solar, you have no control over your price for electricity or how your utility spends your money. Your choice is either to pay the utility rate or sit in the dark.

How can I get a great deal on solar panels?

The best way to get a great deal on your solar panel system is to compare quotes based on cost, equipment, and installer reputation. Instead of relying on a single quote from a door-to-door salesperson or a cold call, compare multiple offers to feel confident in your solar decision.

What can solar panels power?

Solar panels are used to power everything from calculators to sports stadiums to satellites. They can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home.
