

Getting electrical car charge stations at work

Which EV charging station is best for your workplace?

Level 2 chargers are ideal for workplaces due to their faster charging times and efficiency. Remember the charging units' durability, reliability, and user-friendliness when choosing an EV charging station.

How do you assess the demand for EV charging stations?

Assess the Need for Charging at Your Company An employee survey is a perfect place to start assessing the demand for EV charging stations. Ask employees whether they own an EV and where they charge it, or if they're considering buying an EV and if access to charging at work would make them more likely to.

Are You implementing EV charging at the workplace?

As electric vehicles become more common, workplaces are installing EV chargers for their staff and visitors. Here's our ultimate guide of everything you need to consider for successfully implementing EV charging at the workplace.

Why is a workplace EV charging station important?

Modern businesses are uniquely positioned to play a significant role in this transition. As more of your employees switch to electric cars, providing a workplace EV charging station becomes integral for easing their commute and propelling your business towards an environmentally responsible future.

How can employers increase the use of a charging station?

Employers can encourage more use of their charging station by charging fleet vehicles at night or allowing public charging after business hours. Additionally, management should identify who is responsible for enforcing workplace charging policies, which may include parking garage attendants, security personnel, or employee self-monitoring.

How can you manage charging spots with fewer stations than EV drivers?

For organizations with fewer stations than EV drivers, assign two 'charging buddies' to each station. These 'charging buddies' coordinate their charging on a daily basis. Alternatively, assign two employees to each charging spot but give one charging access in the morning and the other access in the afternoon.
