

What is a glacier battery?

“A high-performance battery designed for high-performance mobile phones, a breakthrough in battery life experience, and the beginning of a new era,” says OnePlus. What precisely will the Glacier Battery bring?

What is OnePlus Glacier battery Tech?

Now OnePlus has unveiled its new Glacier Battery tech which was teased the other day that could change things. The new OnePlus Glacier Battery tech was developed together with CATL. One of the changes is to the actual physical size of the battery, where OnePlus and CATL have managed to squeeze a 6,100mAh battery into a 5,000mAh battery space.

Could Glacier battery technology improve battery life?

While the exact details are still under wraps, Glacier Battery technology appears to enable the creation of smaller, more energy-dense batteries than what's currently available. This could be a significant breakthrough in an industry where battery life has long been a bottleneck.

How long does a OnePlus Glacier battery last?

That's no 94-day battery but it beats its own OnePlus 12 which runs off a 5,400 mAh battery. With that much capacity, the Glacier Battery can last up to two days on a full charge, according to OnePlus. Besides the longevity, the Glacier Battery works with OnePlus' 100W fast charge capability, letting it go from one to 100 percent in 36 minutes.

Will OnePlus Ace 3 Pro have a glacier battery?

Some or all of that battery longevity goodness will apparently appear in the new OnePlus Ace 3 Pro phone that is about to be announced soon, and we will know more about the innovation that goes in its giant 6,100 mAh pack on June 20, when OnePlus and CATL will detail the Glacier Battery.

Does a glacier battery fit a Ace 3 Pro?

The Glacier Battery may have more capacity, but it can fit into the slim Ace 3 Pro. Getting into how the Glacier Battery is special, it uses a silicon carbon anode design that was made specifically for high-performance smartphones.

Teaming up with Chinese battery maker CATL, OnePlus developed the Glacier Battery by packing more power into a smaller size, fitting a 6,100mAh cell into the usual 5,000mAh space.

OnePlus has announced a collaboration with the world's largest battery maker, CATL (Contemporary Amperex Technology Co. Limited), on a new battery technology called the "OnePlus Glacier Battery."
