

What is the Go Power 30 amp digital Bluetooth® solar controller?

The Go Power! 30 Amp Digital Bluetooth® Solar Controller is an essential component of our RV solar charging solution. It helps protect and extend battery life by preventing overcharging once your batteries are 100% charged from your solar array. Our new solar controller incorporates several advanced features, including:

How does a 30 amp solar controller work?

Turn your compatible Go Power! ISW Inverter on or off Our 30 Amp Digital Solar Controller features Maximum Power Boost Technology (MPBT). This allows you to override the normal charging algorithm of the solar controller to 'boost' the solar charge, which is ideal at the end of the daylight to ensure batteries are topped up for the evening.

How does GP-SB-pwm-30bt work?

When your battery has reached a 100% state of charge, the controller prevents overcharging by limiting the current flowing into the batteries from your solar array. The Bluetooth®-enabled GP-SB-PWM-30BT is a 12 volt flush-mounted, single-bank, photo-voltaic (PV) charge controller rated for a continuous solar current input of 30 amps.

What is a 30 amp single bank solar charge controller?

The 30 AMP Single Bank Solar Charge controller is coming SOON! It uses PWM technology and increases battery life by preventing over charging.

How does the 30 amp digital Bluetooth® solar controller work?

The updated 30 Amp Digital Bluetooth® Solar Controller also features Maximum Power Boost Technology (MPBT). This allows users to override the normal charging algorithm of the solar controller to 'boost' the solar charge -- ideal at day's end to ensure batteries are topped up for the evening.

What is a solar controller?

A solar controller is an essential component of your photovoltaic (PV) system. The controller maintains the life of the battery by protecting it from overcharging. When your battery has reached a 100% state of charge, the controller prevents overcharging by limiting the current flowing into the batteries from your solar array.

Controller prevents overcharging by limiting the current flowing into the batteries from your solar array. The GP-PWM-30 is a 12 volt flush mounted photovoltaic (PV) charge ...

Available with the DuraLITE portable solar kits only. Actual item may not be exactly as pictured. MODEL: GP-PWM-30-DL The Go Power! 30 amp Solar Controller regulates current flow from the solar panels to the battery and ...

The GP-PWM-30-SB Maximum 37.5A rating is based on a 30 amp total maximum short circuit current rating (Isc) from the parallel solar modules nameplate ratings. The National Electric Code specifies the PV ...

This Bluetooth-enabled 30 Amp digital solar controller protects the life of your solar battery, whether it's Lithium, AGM, or Lead Acid. Features: Dual Bank capable Bluetooth ready; used the Go Power! Connect app (Click here for ...

Go Power!'s silver SLIM Solar Kit (100 watts) with a PWM-30 Amp Bluetooth-enabled Solar Controller is ideal for RVs or boats with limited roof space. Power your lights, fans, and other DC appliances using power generated from ...

Page 1 SPECIFICATIONS Nominal System Voltage GP-SB-PWM-30BT Nominal Charge Current SINGLE BANK Battery Voltage Range 6V -- 16Vdc Scan for full Bluetooth; BLUETOOTH Max Battery Charge Current 37.5A manual Max Solar Power ...

The total rated Maximum Power Current (Imp) of the PV input should not exceed 30 amps. The GP-PWM-30 will limit PV current above 30 Amps. Although the GP-PWM-30 will accept PV current greater than 30 Amps for a short duration, ...

The GP-PWM-30-SQ is rated for a continuous solar current input of 30 amps, uses Pulse Width Modulation (PWM) technology and a unique four stage charging system that includes an optional equalize setting to charge and ...

Model: GP-RVC-MPPT-10 An RV-C capable 10 Amp MPPT Solar Controller uses Maximum Power Point Tracking (MPPT) charging with up to 98% efficiency.... View full details \$165.00 USD

The Go Power! 30 Amp Digital Bluetooth-enabled Solar Controller is an essential component of our RV solar charging solution. It helps protect and extend battery life by preventing overcharging once your batteries are 100% ...

Our Go Power! 30 Amp Dual Bank Bluetooth Digital Solar Controller (GP-PWM-30-UL) features Maximum Power Boost Technology (MPBT). This allows you to override the normal charging algorithm of the solar controller to ...

The GP-SB-PWM Maximum 37.5A rating is based on a 30-amp total maximum short circuit current rating (Isc) from the parallel solar panels nameplate ratings. The National Electric Code specifies the PV equipment/system rating ...

Maximum Power Boost Technology Our New Go Power! 30 Amp Digital Solar Controller now includes Maximum Power Boost Technology (MPBT). This new feature allows you to override the normal charging

algorithm of the solar ...

The Go Power! 30 amp Solar Controller regulates current flow from the solar panels to the battery and prevents overcharging and optimizes battery lifespan.

The GP-PWM-30-UL uses Pulse Width Modulation (PWM) technology and a unique four stage charging system that includes an optional equalize setting to charge and ...

GP-PWM Solar Controller 30-SB: Cautions & Warnings; GP-PWM Solar Controller 30-SB: Errors; GP-PWM Solar Controller 30-SB: Installation & Mounting; GP-PWM Solar ...

MODEL: GP-SB-PWM-30BT The Bluetooth-enabled, GP-SB-PWM-30BT is a 12 volt flush-mounted, single-bank, photo-voltaic (PV) charge controller rated for a continuous solar current input of 30 amps. Easy to install with screw cover ...

MODEL: GP-PWM-10-SQ. The Go Power! 10 amp Solar Controller regulates current flow from the solar panels to the battery and prevents overcharging and optimizes battery lifespan. *Product not sold in stores; ...

The Go Power! Bluetooth-enabled, GP-SB-PWM-30BT Solar Controller is a 12-volt flush-mounted, single-bank, photo-voltaic (PV) charge controller rated for a continuous solar current input of 30 amps. This controller is easy to install with ...

This Go Power! Digital Solar Controller Dual Bank capable and Bluetooth ready when used with the Go Power! Connect app. The 12 volt flush mounted PV charge controller is rated for a ...
