

What is a 30 amp MPPT solar controller?

Store by Go Power! An RV-C capable 30 Amp MPPT Solar Controller uses Maximum Power Point Tracking(MPPT) charging with up to 98% efficiency. MPPT solar controllers optimize an RV's solar charging in all sun and tilt conditions,and are ideal for series wiring configurations.

How does a 30 amp solar controller work?

Turn your compatible Go Power! ISW Inverter on or off Our 30 Amp Digital Solar Controller features Maximum Power Boost Technology(MPBT). This allows you to override the normal charging algorithm of the solar controller to 'boost' the solar charge,which is ideal at the end of the daylight to ensure batteries are topped up for the evening.

What is a MPPT solar controller?

MPPT solar controllers optimize an RV's solar charging in all sun and tilt conditions,and are ideal for series wiring configurations. Easy to install compatible with "smart RV" RV-C systems,this controller comes standard in the 190-watt Solar Eclipse Kits. Actual product may not be exactly as shown.

What is a solar charge controller?

A solar charge controller is an essential component of your photovoltaic (PV) system. The controller maintains the life of the battery by protecting it from overcharging. When your battery has reached a 100% state of charge,the controller prevents overcharging by limiting the current flowing into the batteries from your solar array.
