

Who is Go Power! Solar?

Go Power! is one of North America's leading suppliers of recreational and business solar solutions. We started as a small Canadian distributor of solar energy products and have grown to provide portable, renewable electricity solutions for RVs and other applications. When you need portable, renewable electricity, you can count on us.

What is go power connect?

GO POWER! CONNECT Mobile power, reinvented. Say hello to off-grid connectivity. Being off-grid doesn't mean you need to live in the dark. Go Power! Connect allows you to view essential solar power system information from your Bluetooth-enabled device. Easily find essential system information, set alarms, and view historical data.

What does Go Power! specialize in?

From our beginnings as a small Canadian distributor of solar energy products, Go Power! has grown to become one of North America's leading suppliers of recreational and business solar solutions. When you need portable, renewable electricity, you can count on us.

Does the Go Power Overlander have a generator?

The Go Power! Overlander does not have a generator. It allows you to enjoy the peace and quiet without one, and no longer worry about draining your batteries while away from grid power. The Overlander is the largest single 12-volt solar charging kit on the market, with 200 watts and 9.6 amps of power charging capability.

What is the Go Power! Overlander ideal for?

The Go Power! Overlander is ideal for extended RVing or dry-camping. This powerful battery charger is great for maintaining the charge in all types of batteries and is the largest single 12-volt solar charging kit on the market, with 200 watts and 9.6 amps of power charging capability.

Which solar kit is best for RV off-grid power?

For extended RVing or dry-camping, the RIGID Eclipse Solar Kit is a powerful battery charger that's compatible with inverter chargers and ideal for maintaining battery charge. Alternatively, for RVs or boats with limited roof space, the Go Power! SLIM Solar Kit (100 watts) with a PWM-30 Amp Bluetooth Solar Controller is an excellent choice.

When the sun sets in the evening your solar panels will stop producing energy and the changeover from solar back to the grid or your batteries happens automatically. 6h00 12h00 18h00 Morning sun
