

Does Jayco offer solar prep?

Jayco is proud to be one of the first companies to offer solar prep in every single one of their towable units. With sidewall AND roof-mounted prep kits, you have the option to easily install permanent solar panels.

What does Go Power! offer for solar solutions?

Go Power! offers solar solutions for conserving energy and battery life. Whether it's for full-time boondocking or a spontaneous weekend of camping, they have your solar solutions.

How do you hook up a Go Power Solar System?

Many of these travel trailers are using the Go Power cable entry plate on the RV roof. These cable entry plates make hooking up a Go Power solar kit a breeze. All that is left is mounting the panels, fusing the wire and installing the charge controller. Most of the hard work of running cables has already been completed by the factory.

Is My RV ready for a rooftop solar system?

Your RV is PRE-WIRED for a Rooftop Solar System! Need a Hand? Easily Add Solar! Your RV features a premium quality rooftop entry port that makes solar panel installation faster, easier, and cleaner. The Go Power's Cable Entry Plate on your RV's roof means you can install a solar panel up to 50% faster.

Does a Jayco RV come with a solar prep kit?

Jayco camping trailers, travel trailers, fifth wheels, and toy haulers all come standard with the solar prep kit or have the option to add it on, so you can start sizing your rig today. From peace of mind in case of an emergency, to the pure freedom of being off the grid, solar power for your RV is the next big thing.

What types of solar panels are compatible with the go power prewire setups?

There are 2 main types of panels that we have to match the Go Power prewire setups. These panels are rigid solar panels and flex solar panels. The flex panels can curve to match shapes on Airstreams while rigid panels have better warranties and are usually a little less expensive.
