

What is a Yeti 1250 solar generator?

The Yeti 1250 is a solar generator made by Goal Zero with a lead-acid battery having a 1,200Wh capacity. With the inverter, the AC output runs at 1,200W continuous and 1,500W surge power. The Yeti 1250 can be used for home-backup power and can power appliances like a full refrigerator and microwave.

What is the Goal Zero Yeti 150 solar generator?

The Goal Zero Yeti 150 Solar Generator is a gas free source of portable power to keep lights, phones and laptops powered on through any situation. It's your portable mini powerhouse. A plug and play generator for emergencies, camping, or wherever you need power.

Is the Goal Zero Yeti 1250 really portable?

Then I remembered a solar generator I had first looked at way back in 2012 but always dismissed as not truly portable: the lead-acid Goal Zero Yeti 1250. The Yeti 1250 is a monstrosity heavy 103 lbs (46.7 kg) unit with a group 27 100Ah AGM lead-acid battery at its core.

Can the Yeti 1250 be used for home-backup power?

The Yeti 1250 can be used for home-backup power and can power a full refrigerator and microwave, among other appliances. Regardless of the situation, the goal zero Yeti 1250 makes a big difference when powering your necessities.

How heavy is the Yeti 1250?

The Yeti 1250 is a monstrosity heavy 103 lbs (46.7 kg) unit with a group 27 100Ah AGM lead-acid battery at its core. The good news is that Goal Zero designed this system to have a user-replaceable battery.

Is the Yeti 1250 light enough to lift?

Coming in at 21 lbs and offering more effective capacity than the lead-acid it would replace, I figured it would make the Yeti 1250 light enough to lift and make it actually portable (where my definition of portable is that I can lift it myself and put it into a vehicle for remote use).

This article details how to double the battery capacity of a Goal Zero Yeti 1250 by adding an additional deep cycle battery, extending its runtime from 3.5 to 7 days. This is particularly useful for RVs, vans, skoolies, or ...
