

What should I know before using the goodwe ES series inverter?

GoodWe ES series inverter is design for both indoor and outdoor use. Before using the inverter, please read all instructions and cautionary markings on the unit and this manual. Store the manual where it can be accessed easily.

What are goodwe ES series Inverters (hybrid)?

Trouble shooting GoodWe ES series inverters (hybrid) are bidirectional which apply to PV system with battery to store energy.

Where should I store the Manual of the ES series inverter?

Store the manual where it can be accessed easily. The ES series inverter of Jiangsu GoodWe Power Supply Technology Co. Ltd. (hereinafter referred to as GoodWe) strictly conforms to related safety rules in design and test. Safety regulations relevant to the location shall be followed during installation, operation and maintenance.

Can a user touch/replace a goodwe inverter?

Users should not touch/replace any of the components except for the DC/AC connectors. GOODWE will not bear any consequences caused by unauthorized actions which will lead to potential injury to people and damage to inverters. Static electricity may damage electronic components.

How many volts can a goodwe es Inverter Supply?

For GoodWe ES inverters, it is able to supply a continuous 4600VA output or max 6900VA in less than 10 seconds on back-up side, to support back-up loads. And the inverter contains self-protection derating at ambient temperature 45 °C, and further will shut down at ambient temperature 60 °C. Lithium Battery communication abnormal.

How to connect goodwe DT inverter with RS485 cable?

If there is only one GoodWe DT inverter, RS485 connection cable with waterproof terminal can realize connection. For single inverter communication, choose one among the two terminals. Please use a waterproof cover to cover the port which is not used. 120 Ω termination resistor is controlled by dip switch.
